

Limitless Designs —

Just as unique as you.

From larger than life to small and subtle, to super smooth or ultra-detailed, mix and match to your heart's content.

Be it a driveway, backyard or outdoor kitchen, play with scale, texture, shapes and a variety of colors to design an outdoor space that's as expressive as you.

Color —

More than just shades of grey

Show your true colors. Take cues from your home's exterior to create mixed, matched, or contrasting color statements at ground level.

From grey patio pavers and modern black slabs to pavers inspired by traditional red brick, we have a hue to match your mood.

Strong Geometric Pattern

Display a slightly softer side with bold geometric patterns built from sophisticated shades of grey patio pavers.

Industria 600 x 600 HD² Smooth

Greyed Nickel

Shale Grey

Onyx Black

Deconstructed Color

Design a pure delight for the eye with carefully deconstructed color play.

Hexa HD²+ Smooth

Chestnut Brown

Beige Cream

Greyed Nickel

Onyx Black

Gradient Shades

Combine graduating shades of the same stone in your landscape design to create an eye-catching ombre effect.

Para 500 x 500 HD² Smooth

Beige Cream
Greyed Nickel
Onyx Black

High Contrast

Create a warm welcome with a classic, high-contrast diamond pattern.

Diamond HD² Smooth

Greyed Nickel
Charcoal

Two-tone Stones

A seemingly spontaneous layout of two-tone stones turns a sunken seating area into the main draw.

Industria Triangle HD² Smooth

Chestnut Brown

Beige Cream

High-definition Dining

Bring the indoors out with a high-definition dining space; red brick-inspired linear stones are 'woven' together to form a carpet like chevron pattern.

Texture —

**When it comes to spaces,
finish first**

Our tempting textures are undoubtedly eye candy, but you'll find they're also a treat for your hands and feet.

Tone-on-tone

Texture is a brilliant way to add a subtle shakeup to your outdoor floor plan. Laying tone-on-tone but different-textured Diamond pavers in a seemingly random pattern looks immediately casual and perfectly polished.

Diamond HD² Smooth & Granitex
Beige Cream

Woven Effect

Combine smaller, rough-hewn Valet pavers amongst elegant Ocean slabs to create a spectacular woven effect that keeps the eye guessing and your guests.

Ocean Grande HD²

Greyed Nickel

Valet

Onyx Black

Wood-like Slabs

Show off textural depth in the light of day with a little bit of illusionary play by arranging slabs textured to look like wood blocks at 90-degree angles.

Borealis HD²
Smoked Pine

Square Off

Surprisingly wood-like slabs square off against smaller textured slate stones.

Borealis HD²

Riviera

Antika

Onyx Black

The strikingly wood-like appearance of Borealis slabs falls perfectly into line when partnered with textured Travertina Raw slabs.

Scale ---

Try this on for size

From larger than life to small and subtle and every size in between, there's a stone that fits your scene. Mix and match to max the impact.

Striking Patterns

What makes this pattern so striking? We did the math and it's a perfect fit: the large stones are as wide as the small ones are long.

Para 750 x 500 HD² Smooth

Greyed Nickel

Para 250 x 500 HD² Smooth

Onyx Black

Large Statement at Ground Level

Perfectly placed mini pavers turn a simple slab layout into something spectacular. Our Squadra mini-cube paver pairs seamlessly with larger slabs for a contemporary look that makes a large statement at ground level.

Para 500 x 500 HD² Smooth

Design play ————— ground

Mix & match

Shapes and colors. Scales and proportions. Materials and finishes. This is where every element comes to play in a perfectly orchestrated game of style mastery.

Colors

We love naturals. Thoughtful planning of our color selection means that all your favorite shades show up in multiple collections, making it easy for you to mix, match and contrast to your heart's content.

Color samples are for reference only and actual product colors may vary.

Scale

Mind the scale you're working with. Larger stones are fit for grand spaces while smaller ones are ideal for banding, contouring and mosaics.

Shapes

Ready for something different? There's a lot more to paving stones than just right angles. From classic to creative, explore all the options — then let them be the building blocks for your next big idea.

Classic

The straightforward angles of squares and rectangles forever stand the test of time, laying the groundwork for a look that never goes out of style.

Geometric

From Diamond to Hexa to Triangle and more, we offer at least as many possibilities as you have ideas for mixing and matching these unique geometric shapes.

Natural

Soften the edges and inject an element of creative contrast with nature-inspired textures, shapes and finishes.

Textures

The header doesn't look lined up with the paragraph below - it's indented slightly more to the right than the paragraph, it seems.

Pairings

From coordinated color schemes to flawless finishes, backyard blends are made easy with our cross category collections. Discover the perfect design pairing for your outdoor space that focuses on seamless surfaces from top to bottom.

Tone on tone

Same, but different. We color-match across our collections, making it easy to mix textures, shapes and sizes.

The textured touch

Win by playing the same game. From slabs to pavers to copings and beyond, discover the beauty of working within one consistent texture.

Nature finishes first

Different products, one-of-a-kind feeling. Keeping with a similar finish across collections creates an effortlessly natural or rustic-feeling cohesiveness.

For an authentic look, each color option is composed of a variety of darker & lighter tones. Natural ingredients such as granite are present within the recipe to allow for a range in tones, veining & textures from one stone to another. Final color selection should be made with your contractor from product samples or at your local dealer from stocked product. This color chart serves as a guide for color selection across product lines.

Solar reflectance & LEED credits

Solar reflectance index (SRI) is a value that incorporates solar reflectance (SR) and thermal emittance in a single measure.

The SRI is an indicator of how well a surface reflects (reflectance) and release absorbed solar radiation (emittance). The lower the SRI, the hotter a material is likely to become in sunlight. Dark pavement surfaces tend to have lower solar reflectance values than lighter pavement surfaces. Thus, cautious selection of pavement surface colors can help reduce heat islands which cause urban areas to stay warmer and contributes to air pollution and increased energy consumption. Nowadays, it is not uncommon for some municipalities in North America to require the use of paving materials with an initial SRI of 29.

Furthermore, for LEED certification there are credit requirements for Sustainable Sites Credit: Heat Island Reduction.

The following are some key elements for Nonroof and Parking under cover applications (see LEED v4.1 for a thorough information):

- **Nonroof** (2 points except Healthcare, 1-point Healthcare): Use of paving materials with an initial SR value of at least 0.33.
- **Parking under cover** (1 point): Any roof used to shade or cover parking must have a three-year aged SRI of at least 32 (if three-year aged value information is not available, use materials with an initial SRI of at least 39 at installation).

Techo-Bloc light-colored paving units contribute to the reduction of heat island effects and to obtain LEED points. The table to the right summarizes the colors of Techo-Bloc paving units with SR of at least 0.33 and/or SRI of at least 29.

The values shown in the table may change slightly for the same color due to variations in local aggregates. Contact your Techo-Bloc Representative for our current list of SR and SRI values

TECHO-BLOC COLORS WITH SR OF AT LEAST 0.33 AND/OR SRI OF AT LEAST 29

FINISH	COLOR	SWATCH	SOLAR REFLECTANCE ¹	SOLAR REFLECTANCE INDEX ²
